

# EXPLORING FOR MAJOR COPPER DISCOVERIES.

Strategic | Disciplined | Responsible | Committed

TSX: **COPR** OTCQB: **CPPMF**

Corporate Presentation | February 2025

# Cautionary Notes

This document has been prepared by Coppernico Metals Inc. (the “Company”) to showcase the Company’s mineral exploration projects. Because it is a high-level summary presentation, the information contained herein cannot contain all the information that should be reviewed before making an investment decision.

## SUMMARY OF CAUTIONARY NOTES:

- Forward-looking statements are inherently uncertain;
- Canadian mineral disclosure differs from US mineral disclosure;
- See full disclosure records for Coppernico at [www.sedarplus.ca](http://www.sedarplus.ca) – some information may be found under the Company’s former name, Sombrero Resources Inc., or the predecessor company, Auryn Resources Inc. (now Fury Gold Mines Limited).

Tim Kingsley (VP, Exploration), CP. Geo, is a Qualified Person who assumes responsibility for the technical contents of this presentation.

# Exploring for Major Copper Discoveries in Peru

Our goal is to **extend a world-class copper-gold skarn and porphyry mining belt** through discoveries.

We are exploring what we see as a **direct analogue to Las Bambas, the 11<sup>th</sup> largest Copper producing mine** in the world and other major nearby mines

Prioritizing **safety, community and the environment** at all times.

# Achieving Key Milestones

- 2023** ✓ Completed a social access agreement, valid for 3 years (November 27, 2023)
- 2024** ✓ Commenced surface work ahead of drilling, fostering employment opportunities with the communities (February 20, 2024)
- ✓ Received final drill permits to drill 49 holes from 38 pads (April 24, 2024)
- ✓ Completed \$19.37m financing including \$8.77m strategic investment from Teck Resources. Funding Coppernico for 18 months and 11,500 meters of drilling (May 16, 2024)
- ✓ Strengthened team by appointing Keenan Jennings, former VP Metals Exploration at BHP and Nominating MJ McQuhae, former BHP Executive to the Board (January 17, 2024, and July 15, 2024)
- ✓ Commenced inaugural drill program at Sombrero (mid-July, 2024)
- ✓ Completed listing Coppernico on the Toronto Stock Exchange (August 13, 2024)
- ✓ Reported first batch of assay results (holes 1-5) (November 9, 2024)
- ✓ Commenced trading on OTCQB under the symbol “CPPMF” (November 15, 2024)
- Drilling (ongoing)

# Management has a Track Record of Success

## MANAGEMENT

**Ivan Bebek**  
Co-Founder, Chair & CEO

- **>24 years' experience** in financing exploration, foreign negotiations and M&A
- Formerly President, CEO & Co-founder at Cayden Resources (sold to Agnico Eagle for C\$205M) Former Exec Chair of Auryn Resources & Co-founder Keegan Resources

**Christian Rios** M.Sc., P.Geo.  
SVP, Corporate Development

- **>23 years' experience** in exploration, development, operations and communities
- Directly involved in the discovery of the Santa Ana and Corani deposits at Bear Creek

**Stacy Rowa** CPA, CA  
CFO

- **>18 years' experience** in accounting, auditing and corporate finance
- Was CFO at Auryn Resources (predecessor company)

**Tim Kingsley** MSc, CP.Geo  
VP, Exploration

- **>19 years' experience** in precious and base metal exploration and project development
- Track record in brownfield exploration and increasing mineral resources at Trevali Mining

## DIRECTORS\*

**Ivan Bebek** Co-Founder, Chair & CEO >24 years  
Financing Exploration, Foreign Negotiations and M&A

**Antonio Arribas** PhD >37 years  
Mineral Exploration Experience Across Multiple  
Companies and Regions

**Keenan Jennings** M.Sc., MBA >30 years  
Experience In Exploration, Project Evaluation,  
Mine Development And Production

\*All directors are independent aside from Ivan Bebek who is non-independent

**MJ McQuhae** MBA >25 years  
Business Transformations, Operational Improvements

**Marie-Hélène Turgeon** M.Env., ICD.D, P.Geo >22 years  
ESG, Environmental Management, Legal Compliance  
and Stakeholder Engagement

**Jeffrey Mason** CPA, CA, ICD.D >35 years  
Extensive experience in Corporate Finance in precious and base  
metals projects in the Americas, Asia and Africa

**Gordon J. Fretwell** LLB >32 years  
Corporate And Securities Law

# Experienced South American Exploration Team

**Tim Kingsley** M.Sc., CP.Geo  
VP, Exploration

- **>19 years' experience** in precious and base metal exploration and project development
- Track record in brownfield exploration and increasing mineral resources at **Trevali Mining**

**Antonio Arribas** PhD  
Independent Director

- **>37 years' experience** as a world-renowned gold, copper and silver deposit specialist
- Formerly VP, Geosciences at **BHP**, and held senior roles at **Newmont** and **Placer Dome**

**Christian Rios** M.Sc., P.Geo.  
SVP, Corporate Development

- **>23 years' experience** in exploration, development, operations and communities
- Directly involved in the discovery of the Santa Ana and Corani deposits at **Bear Creek**

**Keenan Jennings** M.Sc., MBA  
Independent Director

- **>30 years' experience** in exploration, project evaluation, mine development and production
- Formerly VP, Metals & Exploration at **BHP**, and held senior roles at **Rio Tinto** and **Anglo American**

**Henry Aliaga**  
Principal Senior Geologist

- **>20 years' experience** across all stages of mineral exploration and mining operations
- Held key roles at major companies: **Minera Antamina, South-West Mining, Buenaventura**

Experience with **globally significant discoveries**

Excellent access to **global geological experts** as needed

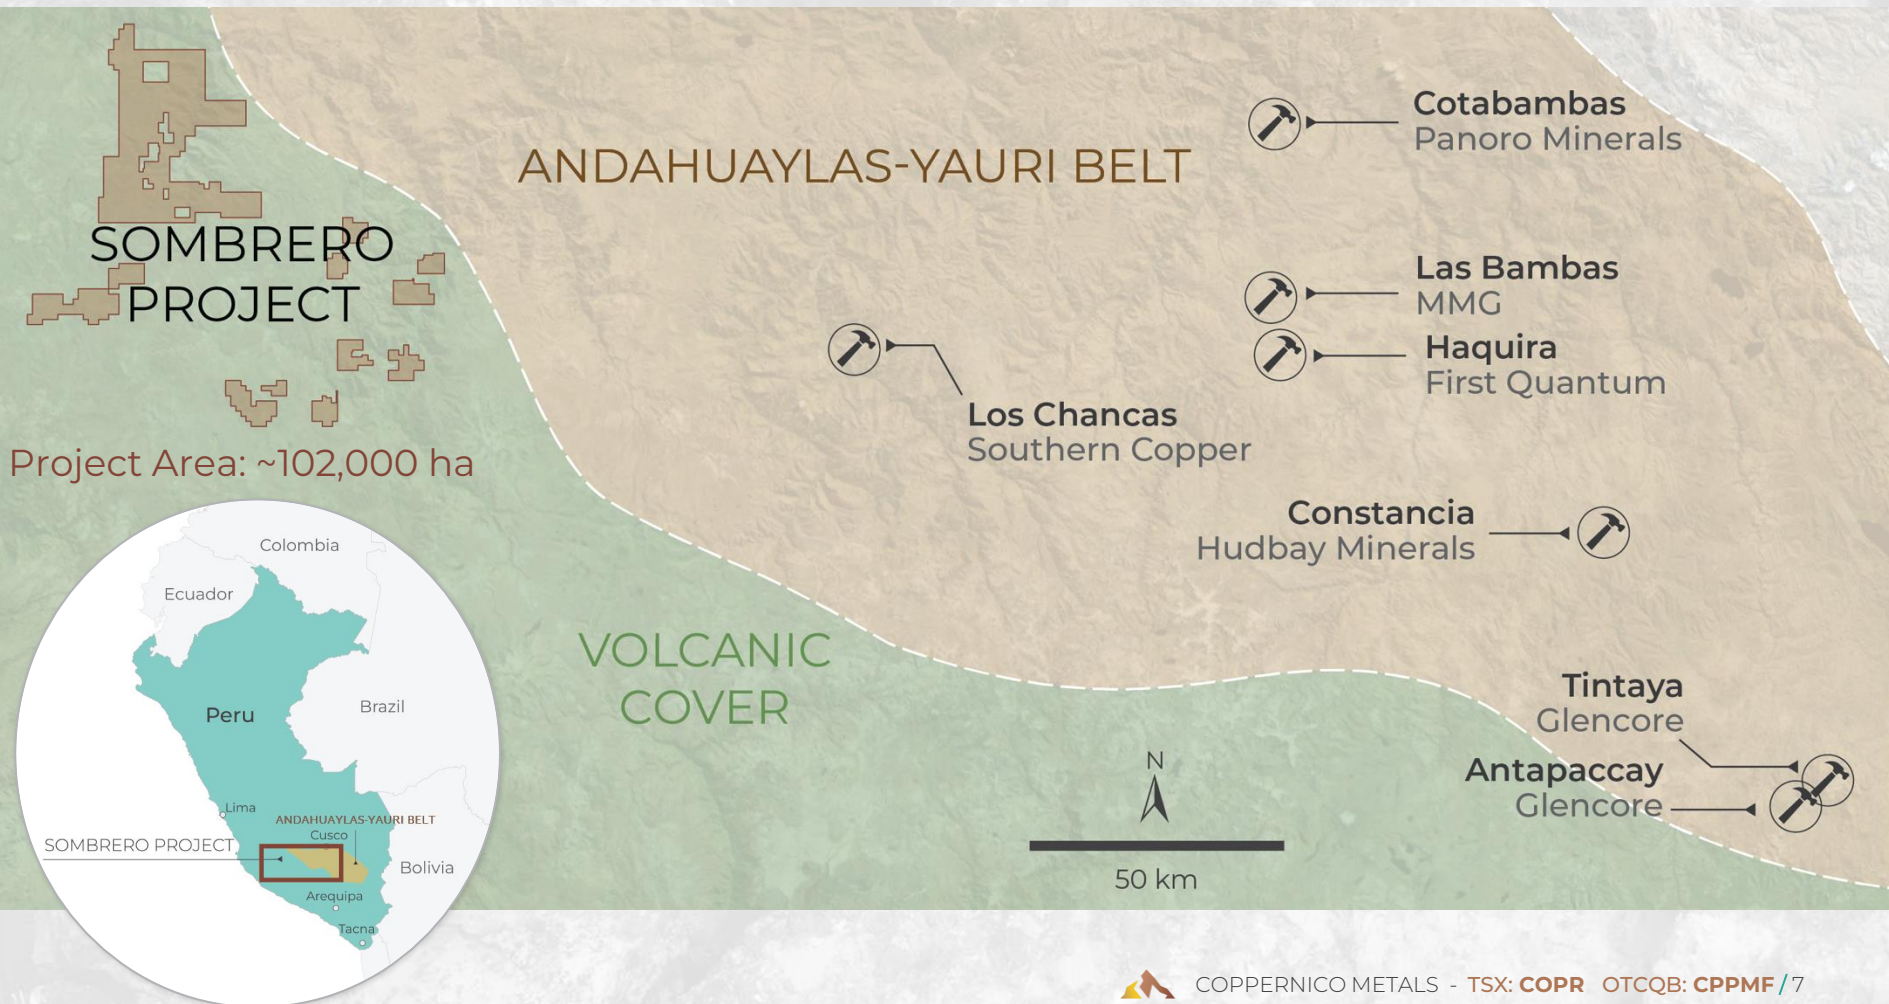

# Exploring the extension of a prolific Copper Mining Belt

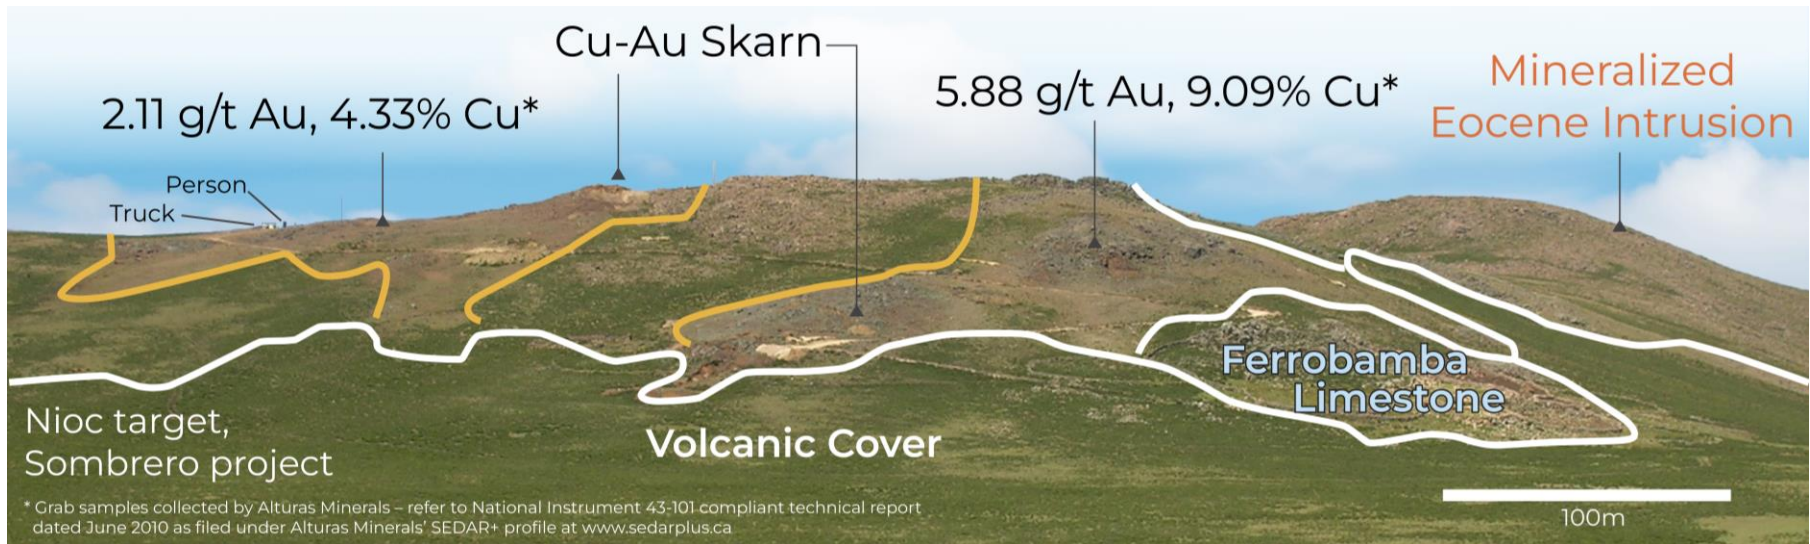

Sombrero hosts multiple scalable high-quality discovery opportunities

Highly underexplored – undergoing first ever drilling for copper and gold

Direct analogues to nearby major mines

# Discovered Through Erosional Windows

## Sombrero Project: Timeline

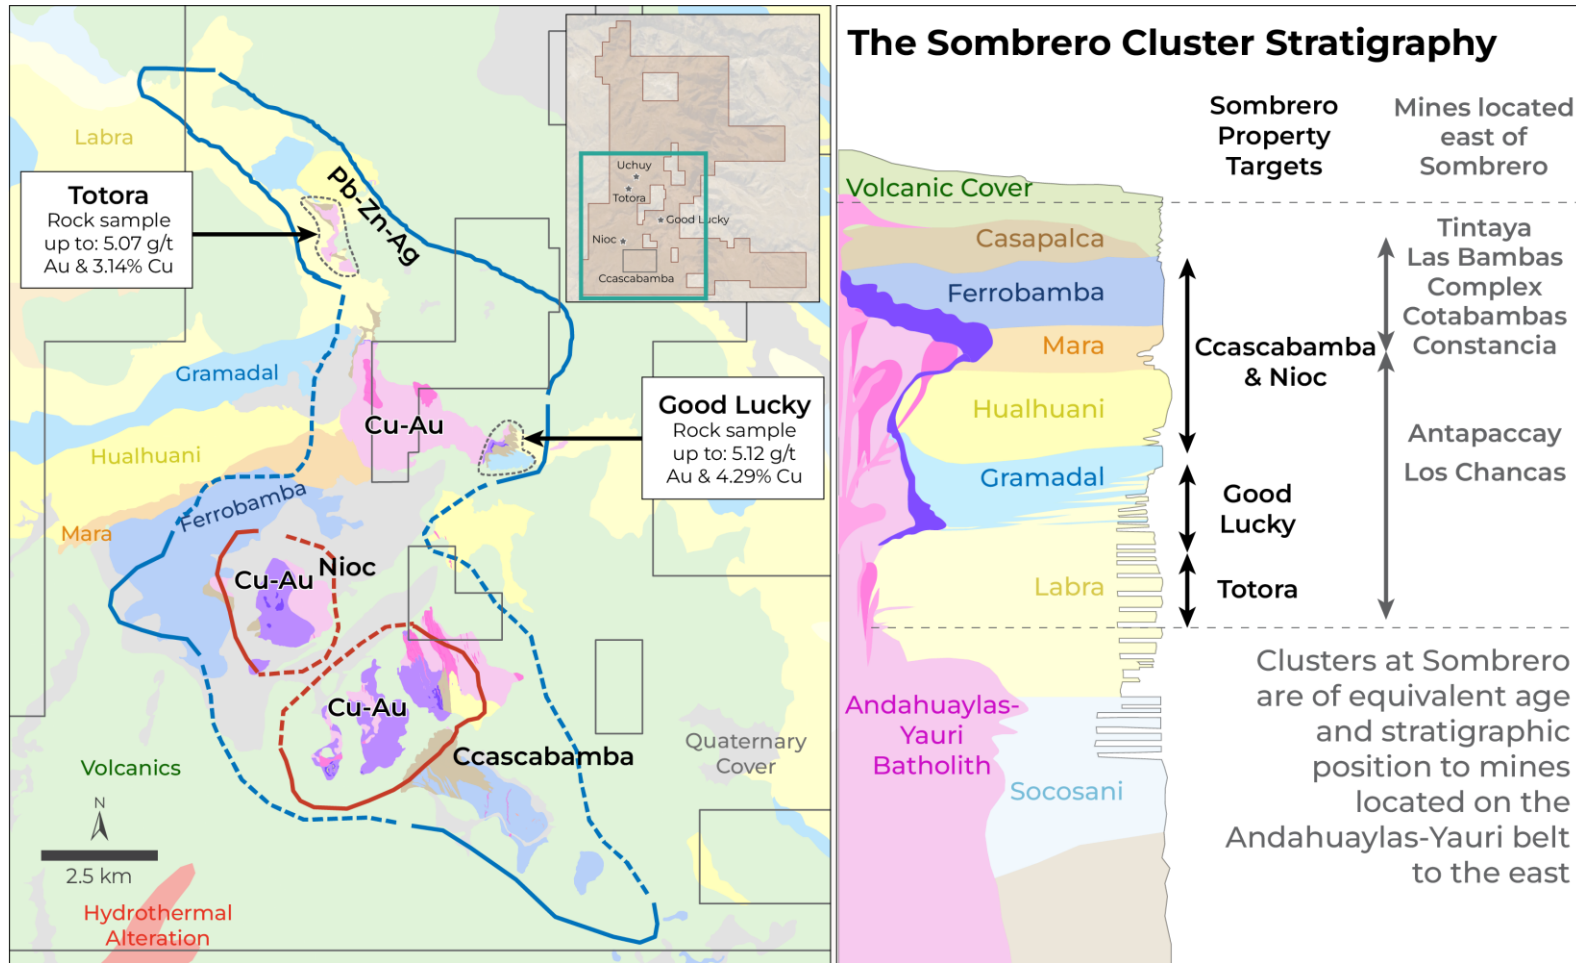

2001	Aceros Arequipa, Peru's largest steel maker, carried out bulk sample testing at Fierrazo.
2007 – 2008	Alturas Minerals completed localized mapping, sampling and geophysics.
2013	Aceros Arequipa completed 8 holes for 988 m drilling at Fierrazo, targeting iron mineralization.
2015 – 2016	Auryn geologists recognized that the Andahuaylas-Yauri belt continues under volcanic cover at Sombrero; skarn and porphyry mineralization in erosional windows prove the concept.
2016	Auryn acquired Ccascabamba claims and carried out prospecting, claim expansion and stream sediment sampling program.
2018 – 2020	Auryn carried out mapping, geochemistry, geophysics, age dating and target generation.
2023	Received Social Access Agreement.
2024 – onward	Fully permitted in H1/2024: Received drill permits, financed 18 months of working capital (\$19.37mm). Coppernico to define, rank and test targets at its land position in the potential western extension of the belt.

# Sombrero: Cluster Geology & Stratigraphy

- Significant metal endowment
- Large geochemical footprint (~18 km x 6 km)
- Multiple prospective skarn horizons

## LEGEND

Alteration	Lithology

# Kilometers of Overlapping Chargeability & Magnetics

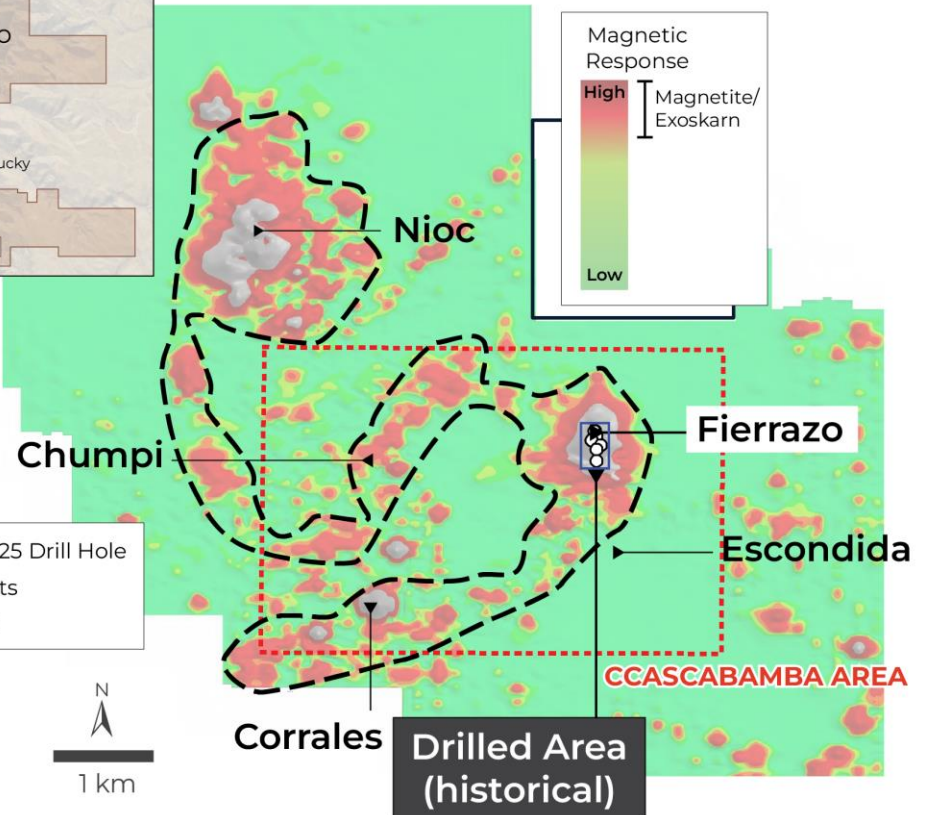

## Chargeability at 3,800 m elevation:

Targeting endoskarn and porphyry copper-gold mineralization

## Magnetic analytical signal on surface:

Targeting high-grade, copper-gold exoskarn mineralization

- IP and magnetic surveys reveal a 10 km trend of targets between Nioc and Ccascabamba target area: maps show chargeability (IP) response at 3800m slice and magnetic analytical signal anomalies on surface.
- Surface mineralization has a distinct geophysical signature, which extends under cover

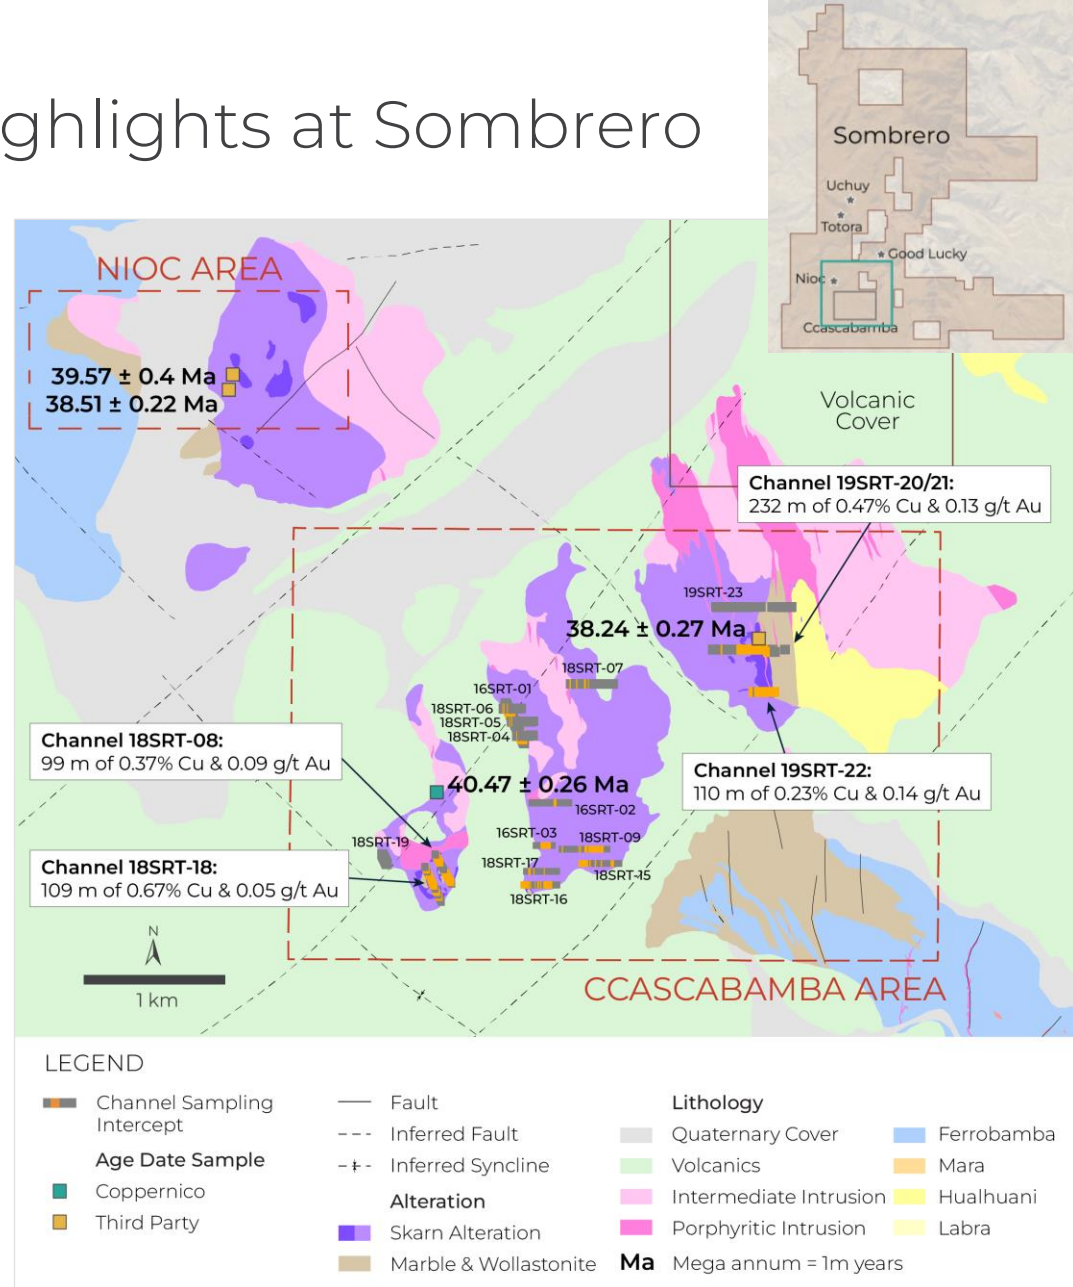

# Selection of Surface Highlights at Sombbrero

- Over 10 km of geophysical targets correlate with significant surface mineralization sampled within erosional windows
- Potential for **significant grade and tonnage**
- **232 m** of **0.47% Cu** & **0.13 g/t Au**<sup>1</sup>
- **109 m** of **0.67% Cu** & **0.05 g/t Au**<sup>2</sup>
- Including **30 m** of **1.86% Cu** & **0.12 g/t Au**
- **99 m** of **0.37% Cu** & **0.09 g/t Au**

## Same age of mineralization as:

- Las Bambas, MMG: **~37.9 Ma**<sup>3</sup>
- Tintaya, Glencore: **38-35 Ma**<sup>4</sup>
- Antapaccay, Glencore: **~35.7 Ma**<sup>5</sup>

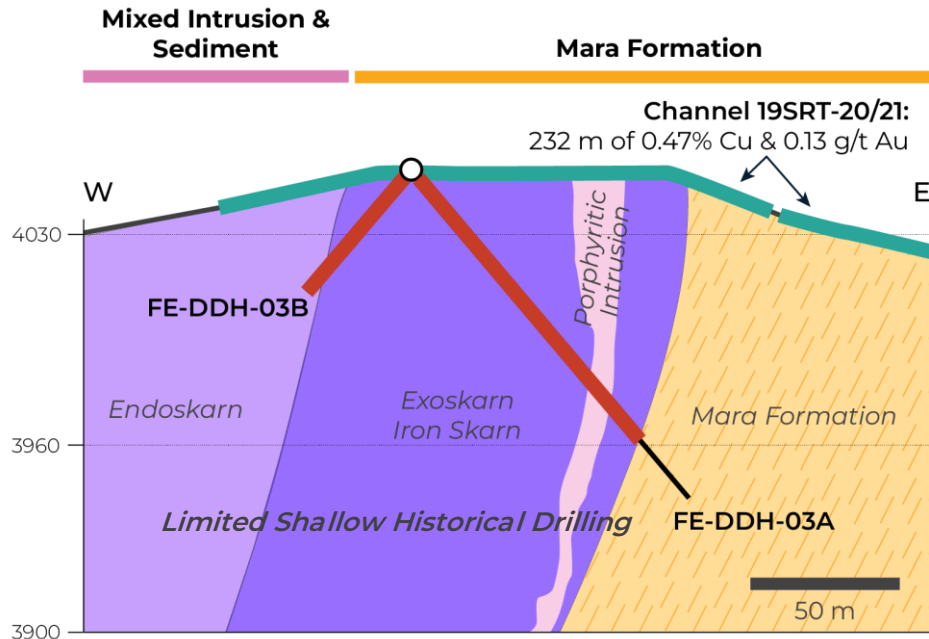

1. This interval is the combined composite of Channels 19SRT 20 and 19SRT 21  
 2. This interval is comprised of two reported intervals. The 25 m gap between the two intervals where bedrock could not be reached was assigned a zero value for both gold and copper grades  
 3. Porphyry-Style Alteration and Mineralization of the Middle Eocene to Early Oligocene Andahuaylas-Yauri Belt, Cuzco Region, Peru, Economic Geology, Vol. 98, 2003. Pg 1575-1605

4. The Eocene Corocochuayco and Tintaya Copper Porphyry-Skarn Deposits, Peru: 5 Ma of Favourable Tectono-Magmatic Evolution, Metadatos INGEMMET, Pg 2  
 5. High-Resolution Geochronology of the Corocochuayco Porphyry-Skarn Deposit, Peru: A Rapid Product of the Incaic Orogeny. Society of Economic Geologists, Inc., Economic Geology, v. 110. Pg 423-443

# Mineralized Historical Drill Core Supports Robust Model

## Subsurface Mineralization Correlates with Geophysics

At 33 m: 1.32% Cu and 0.03 g/t Au in hematite vein stockworks with malachite staining at their margins

FE-DDH-03B

At 62 m: 1.35% Cu and 0.54 g/t Au massive magnetite with disseminated pyrite in sulphide zone

FE-DDH-03A

Shallow historical drilling<sup>1</sup> along a portion of the geophysical anomalies demonstrates **high-grade mineralization from surface** that continues to depth and provides direct validation of the 10 km geophysical signature:

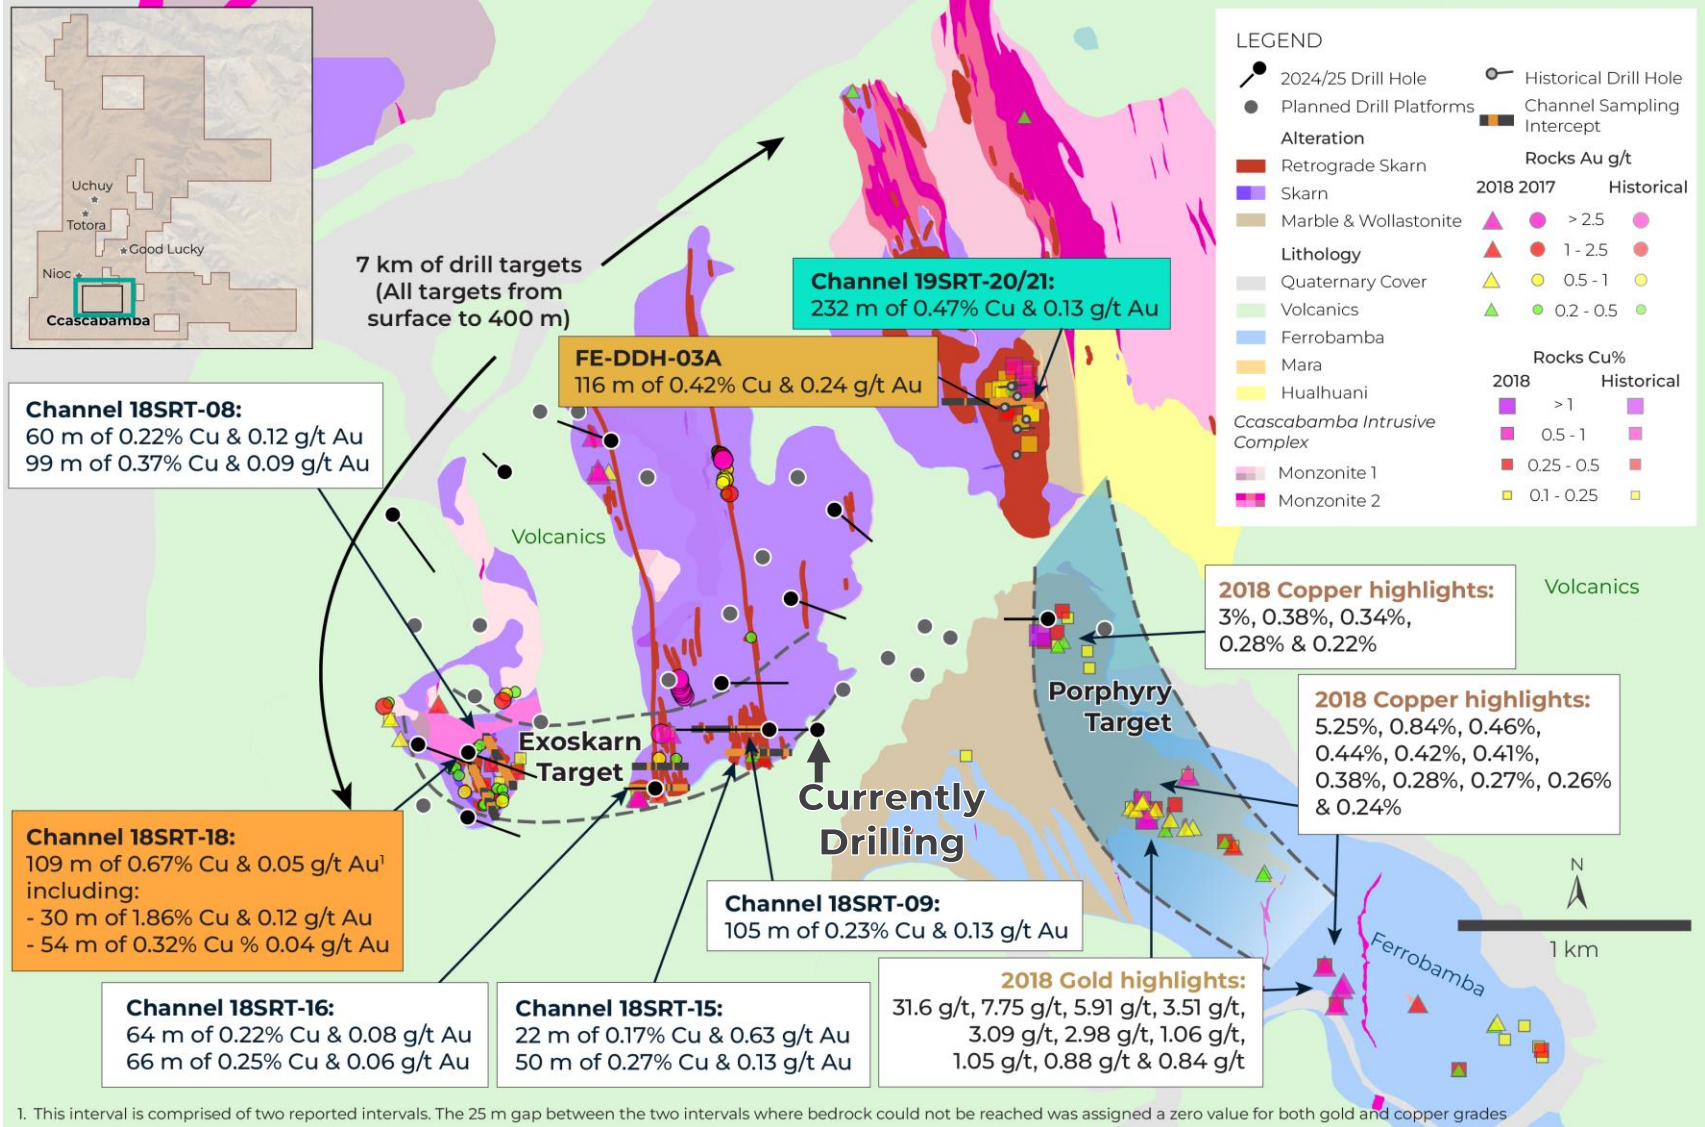

Hole ID	Interval <sup>2</sup> (m)	% Cu	g/t Au
FE-DDH-01A	90.4	0.48	0.05
Including	41.8	0.88	0.02
FE-DDH-02	51	0.43	0.16
Including	20.95	0.70	0.25
FE-DDH-03A	116	0.42	0.24
Including	64	0.64	0.38
FE-DDH-03B	50.8	0.44	0.15
True thickness of mineralization is unknown			

1. 2013 drilling completed by Aceros only assayed for iron, resampled by Auryn in 2019 (See Auryn news release dated June 13, 2019)

2. No less than 5m of  $\geq 0.1\%$  Cu, maximum dilution 6 m (See technical disclosure on See Auryn news release dated June 13, 2019)

# Drill Plan & Highlights: Ccascabamba Target Area

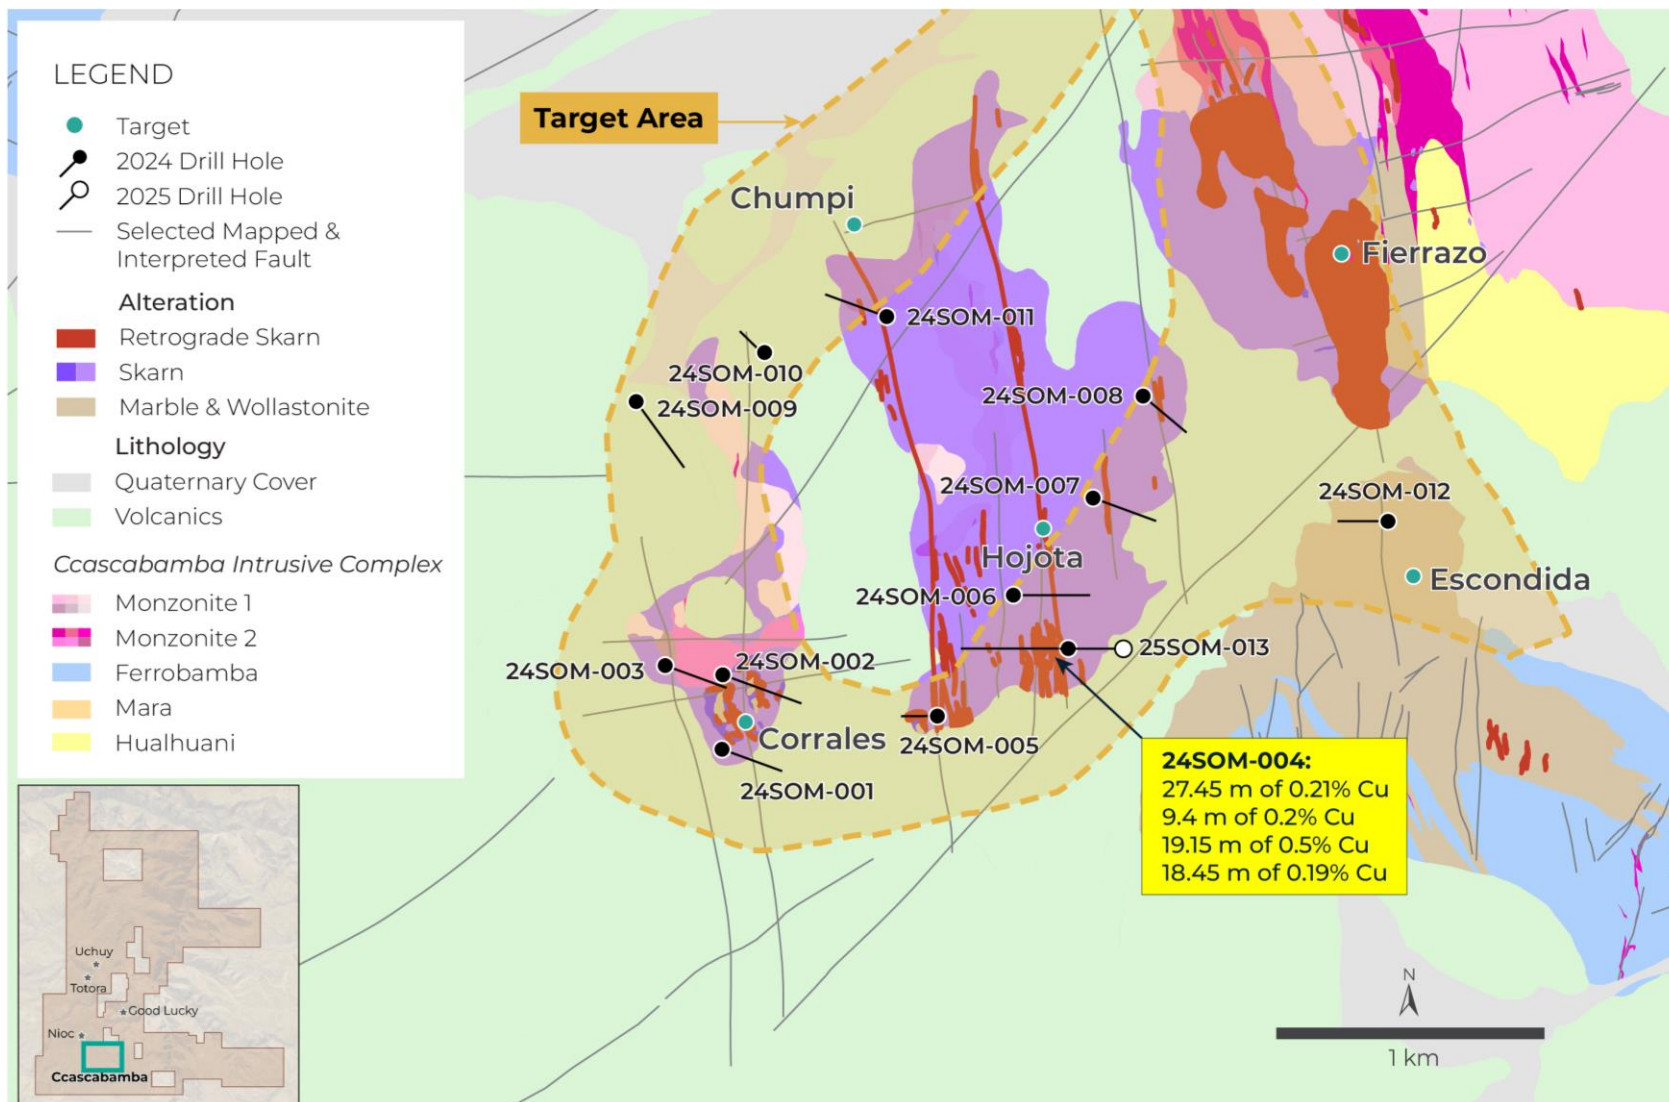

DIA\* (environmental permit) allows for up to 49 holes to be drilled from 38 drill pads at Ccascabamba target area

\* Declaración de Impacto Ambiental

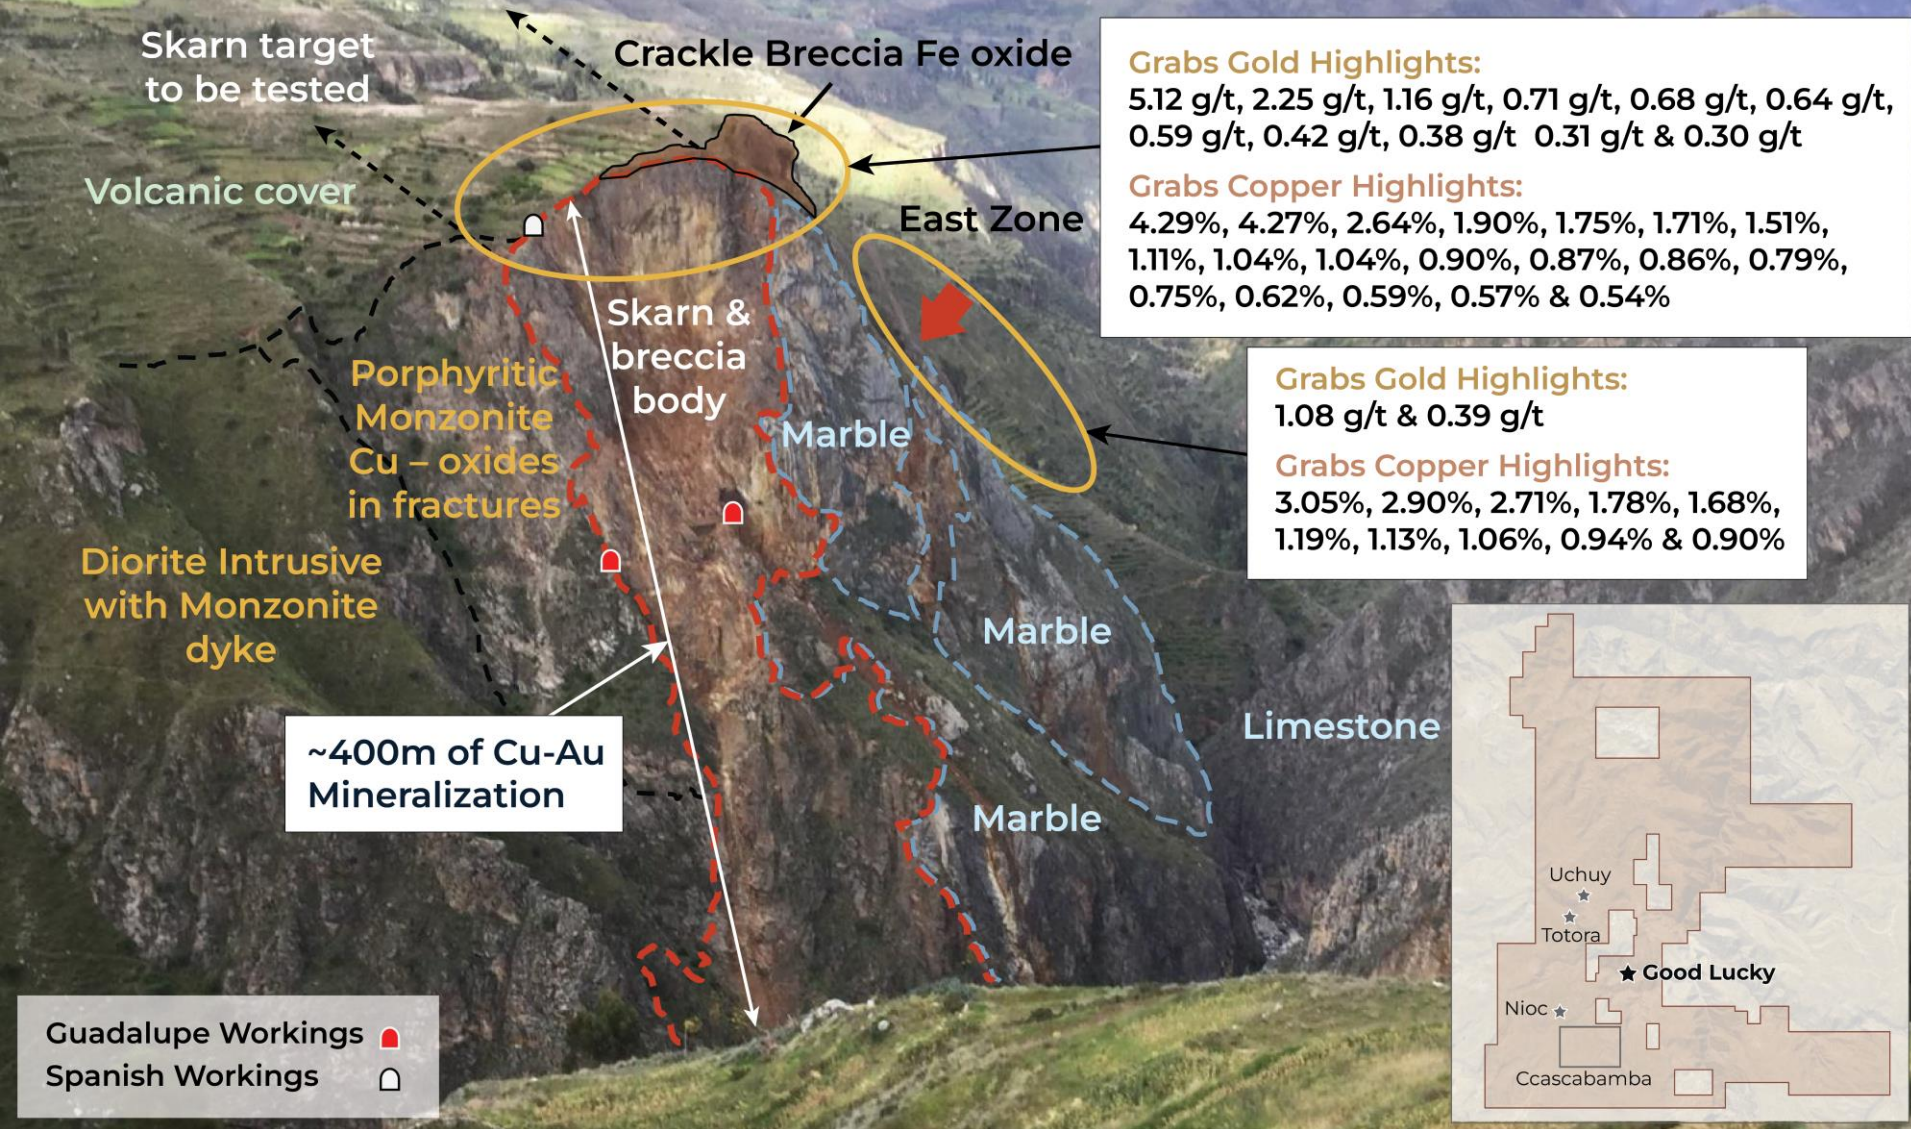

# 2024/25 Drill Update: Ccascabamba Target Area

Twelve diamond drill holes for a total of 5,286.7 metres have been completed exploring the Corrales, Hojota, Chumpi and Escondida target areas.

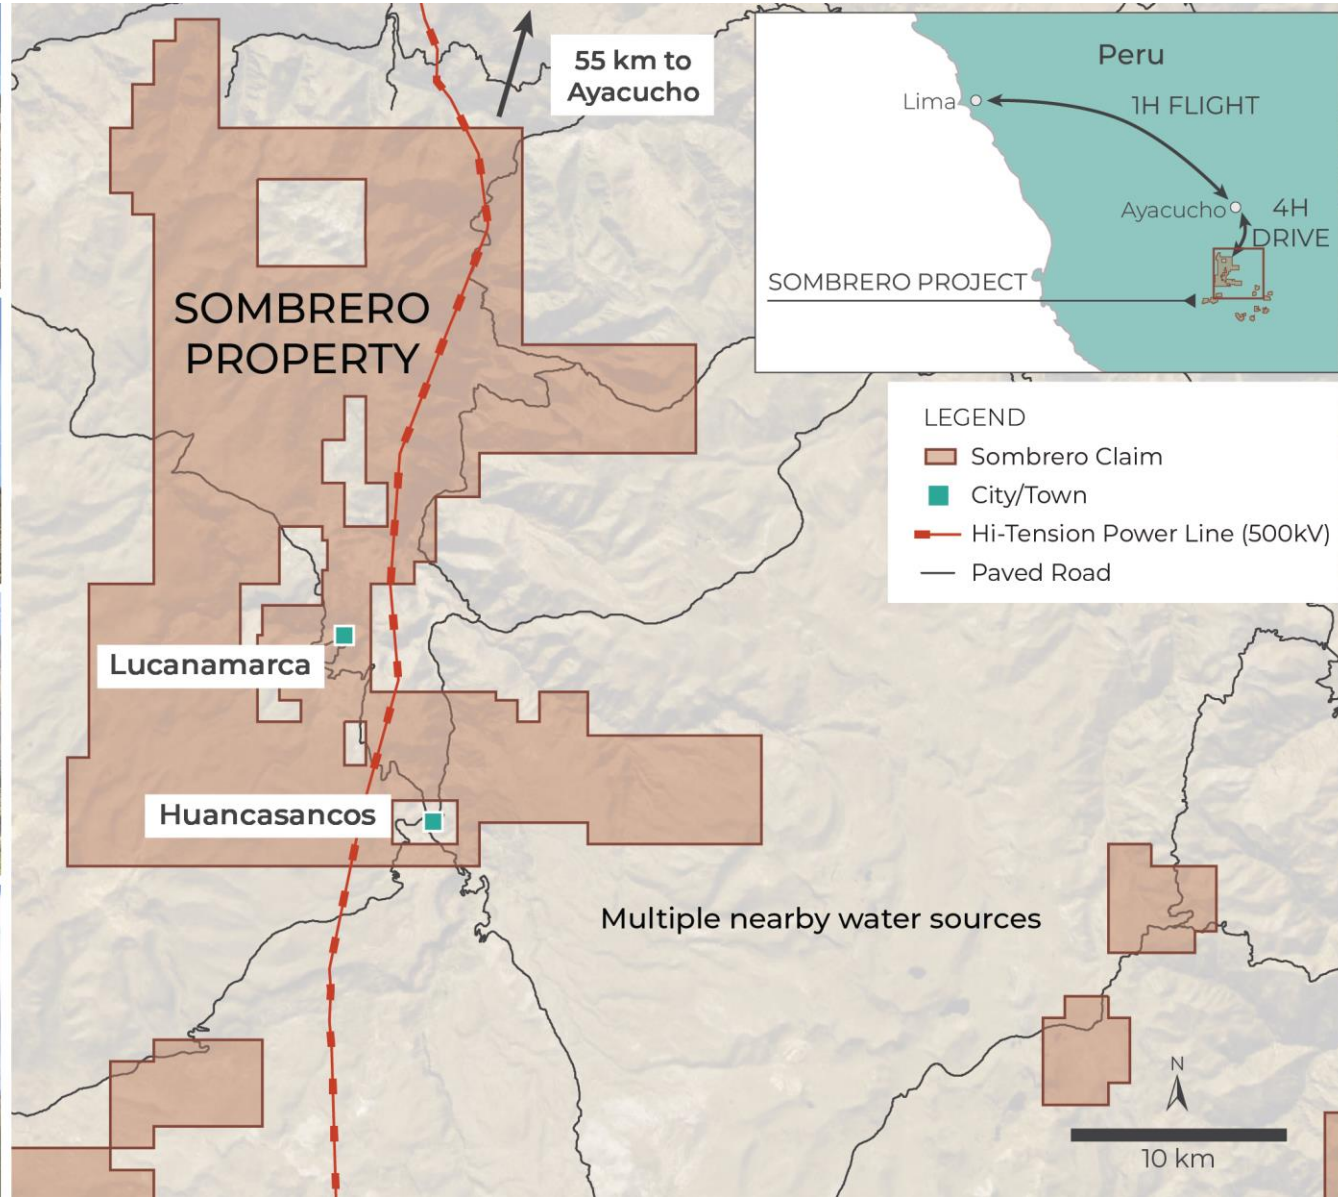

# 400-m Vertical Window of Potential Mineralization

**Good Lucky Target 7km NE of Ccascabamba Target**

# Exceptional Access to Infrastructure

# Collaborating with Communities for over 9 Years

Genuine partnerships with local communities

Peruvian  
community team  
has **extensive  
background and  
experience in  
collaborating with  
local communities**  
in the central  
southern Peru

One technical  
specialist in  
animal health

Two Quechua  
speakers and an  
agricultural engineer

Social field leader, Jose  
Pino, is a specialist in  
Agroideas Business Plan

# Implementing Sustainable Positive Benefits

# Fully Permitted to Commence Drilling Activities

## HUANCASANCOS:

- **Environmental permit (DIA)<sup>1</sup> in place** – allows for up to 49 holes from 38 drill pads at Ccascabamba target area
- **Three-year renewable social access agreement in place**
- **Start of Activities permit (IDA)<sup>2</sup> in place** – allows for the initiation of drilling activities.
- **Working on additional social access agreements in the region**

1. Declaración de Impacto Ambiental  
2. Inicio de Actividades

3. Formerly referred to as the Sombrero Main Target area

# 2024 Disciplined Exploration Approach

Initial drilling:

- Target mineralization **between 0 m and 300 m below surface**
- Test various **skarn and porphyry targets** within the Ccascabamba target area

**Targets are supported by high-grade** surface sampling (including 109 m of 0.67% copper and 0.05 g/t gold<sup>1</sup>) and coincident geophysical anomalies

1. This interval is comprised of two reported intervals. The 25 m gap between the two intervals where bedrock could not be reached was assigned a zero value for both gold and copper grades

# Sombrero Project: Summary

Established **three-year renewable social access agreement**, fostering ongoing sustainable social programs and job opportunities

**Multiple targets with Eocene age mineralization** on surface and in historical drill holes with direct analogues to several nearby major mines

**7km strike length** target rich drill area

Year-round accessibility with **existing infrastructure, power and multiple water sources**

**Large-scale high-grade, drill-ready** advanced exploration targets

# Sombrero Property: Ownership

**Sombrero property covers approx. 100,000 hectares**<sup>1</sup> which has been acquired through a combination of staking and option agreements

Ownership	Claims	Hectares
<b>Direct*</b>	<b>114</b>	<b>100,800</b>
Aceros Option	3	600
Mollecruz Option	4	1,300

\*Sombrero Minerales S.A.C is Copernico's wholly owned subsidiary in Peru through which the Company directly owns its concessions

1. The total claim area is reported as 102,699 Ha; however, it is noted that there are overlaps within the claims. Following the removal of these overlaps, the effective area is ~97,000 Ha.

# Aceros Option: Payments

Due Dates	Property Payments (US\$)	Property Payment Status	Work Expenditures (US\$)	Work Expenditure Status
December 13, 2018	\$140,000	Completed	-	-
December 13, 2019	\$60,000	Completed	\$150,000	Completed
Within 6 months of obtaining access	\$250,000	Completed	\$500,000	Completed
Within 24 months of obtaining access	\$350,000	Completed	\$1,500,000	Deferred
Within 36 months of obtaining access	n/a	n/a	\$3,000,000	Deferred
<b>Total</b>	<b>\$800,000</b>		<b>\$5,150,000</b>	

- If the option is exercised, a joint venture will be formed in which Coppernico will hold an 80% interest and Aceros will hold a 20% interest in these concessions
- In 2021, the Company amended the agreement to defer the work expenditure requirements dependent on access to the concessions, in exchange for an additional annual payment of US\$100,000 for the period that the option is in place

# Mollecruz Option: Payments

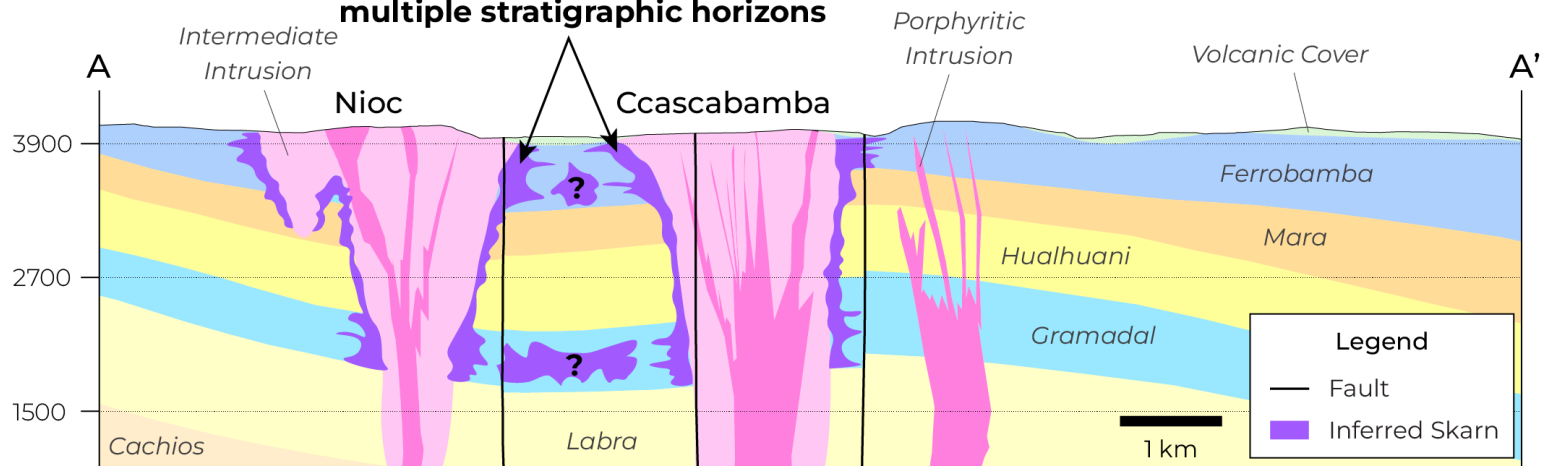

Due Dates	Property Payments (US\$)	Property Payment Status	Work Expenditures (US\$)	Work Expenditure Status
June 22, 2018	\$50,000	Completed	-	-
Subject to access	\$50,000	Completed	\$150,000	Deferred
Subject to access	\$100,000	Deferred	\$150,000	Deferred
Subject to access	\$200,000	Deferred	\$500,000	Deferred
Subject to access	\$300,000	Deferred	\$700,000	Deferred
Subject to access	\$900,000	Deferred	\$1,500,000	Deferred
<b>Total</b>	<b>\$1,600,000</b>		<b>\$3,000,000</b>	

- The Company may acquire a 100% interest, subject to a 0.5% net smelter royalty fee, through a combination of work expenditures and cash payments
- On May 20, 2019, the Company formally declared the existence of a force majeure event thereby deferring the Company's obligation to make the June 2019 property payments and any subsequent property payments and work expenditures for a maximum of 24 months from the declaration date
- On March 1, 2021, the Company agreed with the owner to extend the force majeure declaration for another 24 months and paid US\$50,000 as consideration for the June 2019 property payment. As a result, the Company was able to continue deferment of the remaining property payments and work expenditures until May 20, 2023
- On May 15, 2023, the Company amended its option agreement and extended the recognition of the force majeure status until such time an agreement or agreements are in place that allow the Company to access the concessions in order to carry out exploration work
- A payment of US\$5,000 was confirmed and paid at the time of amendment and will be paid annually under the option agreement until access to the concessions is achieved by the Company

1. See NI 43-101 Technical Report on the Sombrero Main/Nioco Project, Ayacucho Department, Peru – effective date April 17, 2024, prepared by APEX Geoscience Ltd. and Mining Plus.

# Drill Core from Hole 24SOM-004

The drill core exhibits significant skarn alteration over long intervals, as well as zones of strong hematite (iron) replacement of original rock

~70m intercept of Fe skarn (hematite/magnetite) replacement of limestone

*“The Ccascabamba Area represents a large, very active mineralized system, and the extent of skarn alteration and the presence of sulphide minerals in hole 4 support our exploration thesis. This, combined with the complexity of the vein systems, indicate that we are in a highly prospective zone.”*

- Tim Kingsley, VP of Exploration

# Drill Core from Hole 24SOM-004

Hole 4 displays zones with high concentrations of sulphide minerals including pyrite, chalcopyrite and pyrrhotite. Several intervals show a complex network of overprinting vein generations more than one of which contains chalcopyrite.

Diorite with secondary biotite alteration overprinted with several vein generations:

1. Garnet veins
2. Magnetite with epidote and chlorite veins, with a second event of pyrite deposited along magnetite borders with an associated sericite alteration halo.
3. Anhydrite + sulphides (pyrite - chalcopyrite - pyrrhotite - sphalerite) veinlets with sericite and chlorite alteration halo.
4. Late calcite and silica veins.

# Drill Core from Hole 24SOM-004

- Garnet exoskarn overprinted chlorite +/- pyrite retrograde event.
- Cut by anhydrite + sulphides (pyrite - chalcopyrite - pyrrhotite - sphalerite) veinlets.
- Sulphides also present as disseminations.

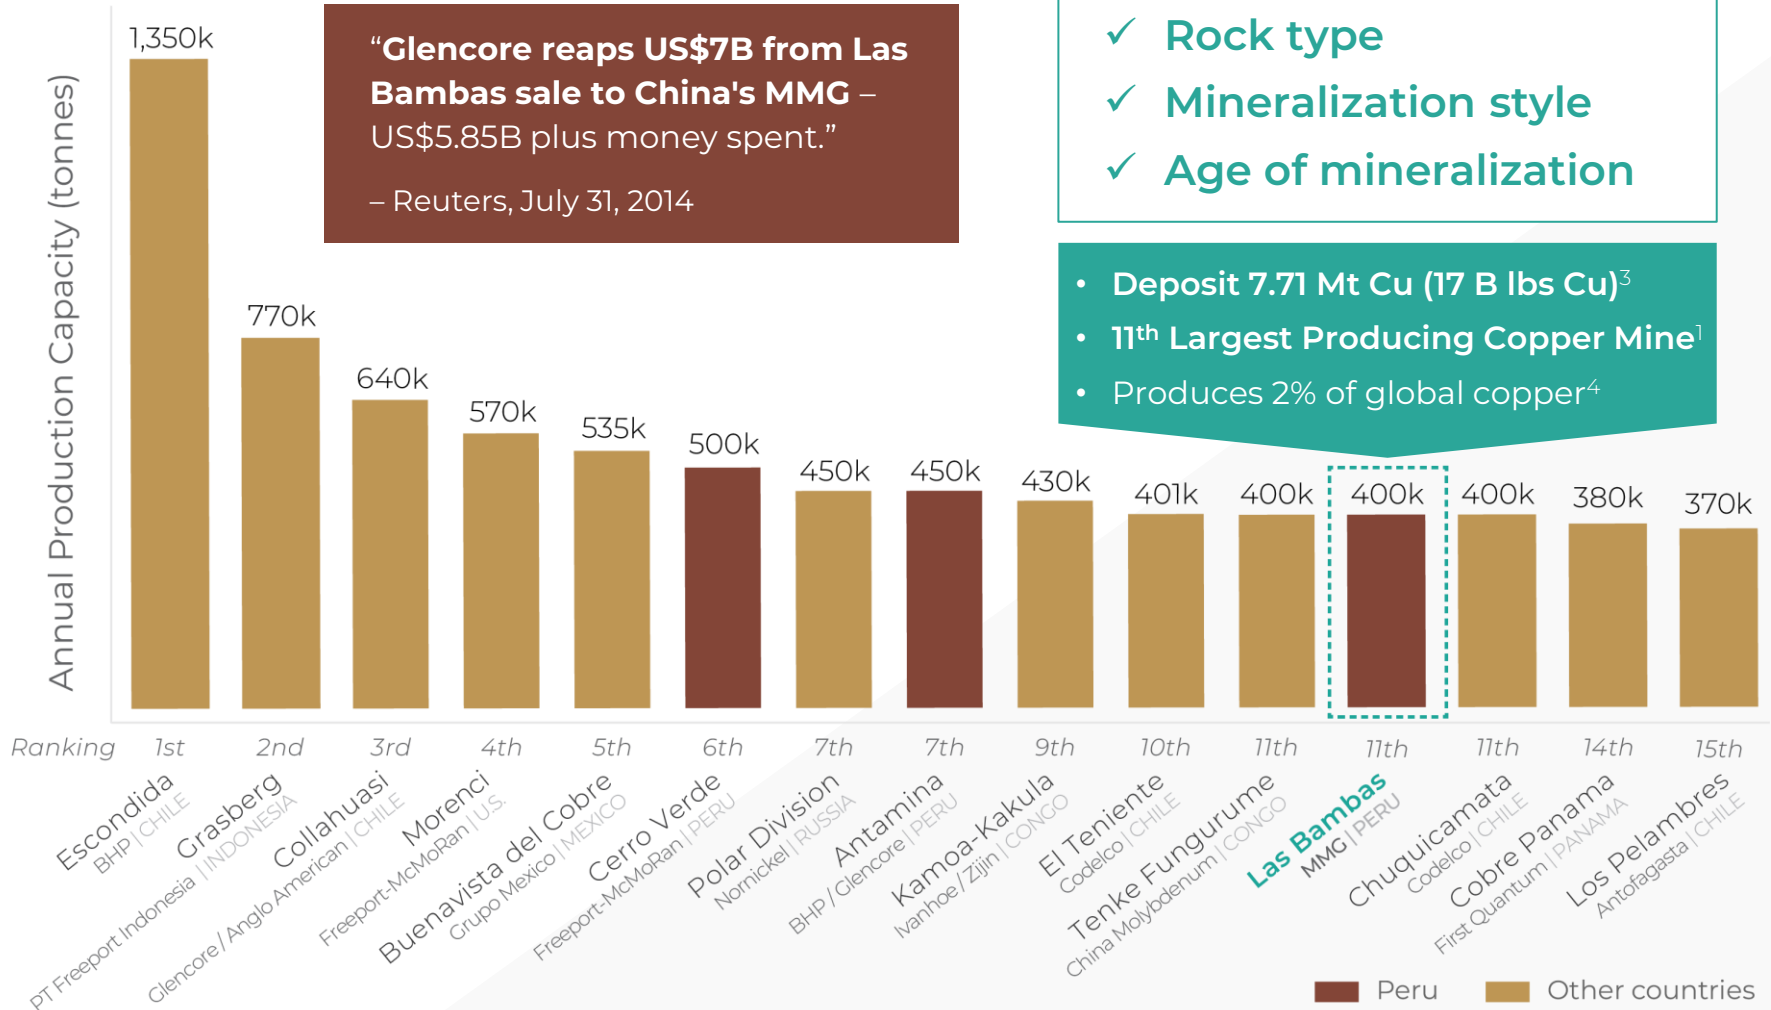

These geological characteristics suggest a robust and multiphase mineralized system and further strengthen the potential for significant copper-gold skarn mineralization at this target.

# Initial Drill Targets Analogous to Las Bambas Mine

## WORLD'S TOP 15 LARGEST COPPER MINES<sup>1,2</sup>

- A direct comparison to the Sombrero Project based on:
- ✓ **Scale**
  - ✓ **Rock type**
  - ✓ **Mineralization style**
  - ✓ **Age of mineralization**

- **Deposit 7.71 Mt Cu (17 B lbs Cu)<sup>3</sup>**
- **11th Largest Producing Copper Mine<sup>1</sup>**
- **Produces 2% of global copper<sup>4</sup>**
